

Ease your life

2026

EGE, Makes *Life* Easier

Established in 1996, Ege Home Products Inc. started its commercial activities with the production of ironing boards, clothes dryers and step ladders. Manufacturing in its two factories in Izmir Torbali with over 500 employees in a closed area of 90,000 m², it has reached a leading position in its sector by adding camping products to its product range over the years.

Adopting excellence as a principle in all its processes with its consumer-oriented approach and new models it has developed, Ege Home Products Inc. delivers its products and services to clients in more than 120 countries on 6 continents.

Thanks to the energy produced by the solar panels installed on an area of 55,000 m², it fulfills its responsibility towards the environment and reinforces the main principle of sustainability.

From tube production to paint shop, from plastic injection line to assembly, from fabric workshop to storage Ege Home Products Inc. carries out all production stages in its modern integrated facilities and manufactures its products of high standards by keeping the quality of the materials used under strict control.

6500 FLAT⁽²⁺⁰⁾

Tiny

Technical Properties

Outside dimensions:

6.500mm x 2.55m - h: 2.500mm

Internal dimensions:

6.368mm x 2.35m - h: 2.448mm

Living Area: 14m²

Accommodation Capacity: 2 Adults

Axle Carrying Capacity: 3,500kg

License Features: With O2 Certificate and License Plate

Carrier System Modular:

Industrial Painted, Reinforced Chassis

The chassis consists of a box profile carcass and is welded by gas welding. After the chassis strengthening process, the chassis of the vehicle becomes a more rigid body.

Structure and Roof System:

Roof; FRP Composite Panel Technology

Glass fiber reinforced (GRP) is a composite material containing glass fibers reinforced with a thermoset or thermoplastic matrix material.

FRP combines high strength, lightness, high hardness, high fatigue resistance and chemical resistance.

Exterior Facade:

Composite Sandwich Panel

It is a polyurethane insulated panel, covered with 60 mm sheet metal on both sides. The biggest advantage of Polyurethane/Insulated Facade Panels is the high thermal insulation it provides with low insulation thickness.

Exterior Facade:

JOTUN Grainy Ready Decorative Coating

Thanks to its fine grain structure, it gives buildings a decorative and protective appearance.

It provides long-term use thanks to its plastered metal surfaces and self-supporting acrylic emulsion-based, high-quality materials.

Interior Facade:

Wall Panel

Beyond being just a static element surrounding a room, AGT wall profile offers both a functional and aesthetic solution thanks to its ability to absorb sound with its acoustic wall profile, allowing you to create quieter and more peaceful spaces.

Floor Coating:

Class 32 Laminate Flooring

It is anti-allergenic and made of 90% wood-based composites (the main layer is usually HDF). Anti Bacterial Comfort is an anti-bacterial coating to prevent bacterial growth and provides a clean environment.

Joinery System:

PVC Facade System / Insulating Glass Synergy

Bathroom Furniture: Water and moisture resistant MDF laminated flooring is used in kitchen and bathroom furniture. First class sanitaryware products are used in kitchens and bathrooms.

Heating & Cooling System:

1 Unit 12.000 BTU Air Conditioner Infrastructure – Ready to be Installed

1 Instant Water Heater Infrastructure – Ready to be Installed

Ventilation: 1 Piece Vent System

Electricity System:

NYM Cable

24 fuse box consisting of 20 Amperes and 32 Amperes will be used along with the residual current relay.
